tentsile

THE WORLD'S MOST VERSATILE TENT

www.tentsile.com

Introduction

Why? Because the world is not flat.

tentsile offers the comfort of a hammock with the accommodation capacity of a multi-person tent. No need for roll mats or to endure lumpy ground conditions!

Ground conditions for conventional camping can limit site location choices but with tentsile, the sky really is the only limit.

What is tentsile?

tentsile is a suspended tent, taking inspiration from the natural world by mimicking a spider's web. Made from 3 weights of rip-stop nylon sheet fabrics, tentsile utilises the material's integral strengths for different sections of the tent body.

tentsile offers comfortable sheltered accommodation in any environment and is the world's first suspended tent designed for use anywhere, by anyone.

How can you use it?

tentsile provides shelter in every kind of environment with minimal footprint or impact.

It is adaptable to suit uses including:

- outdoor play
- expedition
- camping
- festivals
- Safaris
- winter sports
- wildlife filming
- scientific research
- military
- Beach accommodation

If ordered in sufficient quantities, **tentsile** can provide a low cost, effective accommodation solution to many humanitarian and natural disaster situations.

As **tentsile** is suspended above ground level, there is no need to clear areas of dense foliage and can be easily erected over water logged ground, desert sands, and rocky landscapes.

Product range

Tentsile is available in a range of sizes to suit any location or environmental conditions. Each unit is bespoke and made to order, tailored to the specific needs of the client. The floor of **tentsile** can be replaced with trampoline mesh to form an enclosed play space.

Type A

Type B

Type C

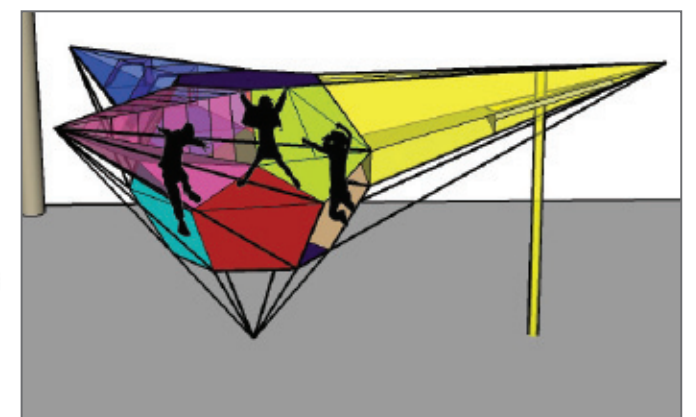

Type C: 5-8 Person tentsile

Type B: 3-4 Person tentsile

(Note: Single Point Stand still in development)

tentsile can be adapted for use as a Pop-Up playground

✉ info@thegreendream.com

Brief Description

The 2 person **tentsile** is designed for lightweight portability and comfort, able to be set up from any three anchoring points including trees, buildings and vehicles.

The covered porch area provides suspended seating outside a zipped door which leads through to a double hammock bed with storage space underneath. Unlike conventional hammocks, the material bed is also tensioned width-wise so that the inhabitants don't roll into each other!

Materials

All sheet materials are fire retardant, UV resistant, rot proof and breathable.
 2 Ounce silicon coated nylon Rip-Stop fly sheet
 4 Ounce silicon coated nylon Lower sheet
 6 Ounce PU coated texturised nylon Hammocks
 Mesh bed flooring
 35mm webbing strap skeleton
 30mm aluminium central pole
 2 x aluminium battens

Weight Capacity

tentsile's frame is made from webbing straps with a breaking strength of 2.5 tonnes.

Type A is configured to take the weight of two adults and their luggage.

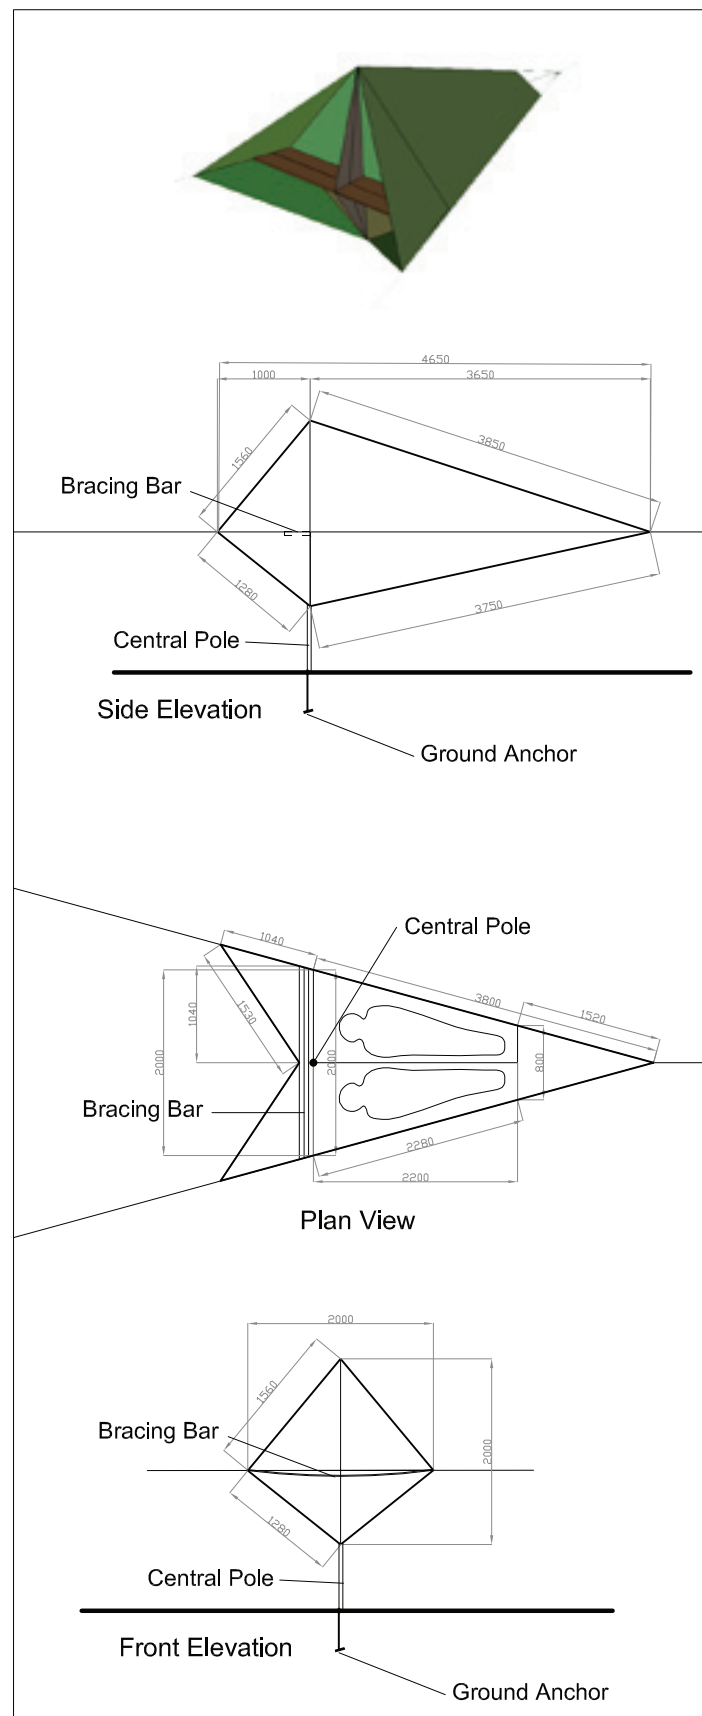

300 kg
660lbs

Set-up Time

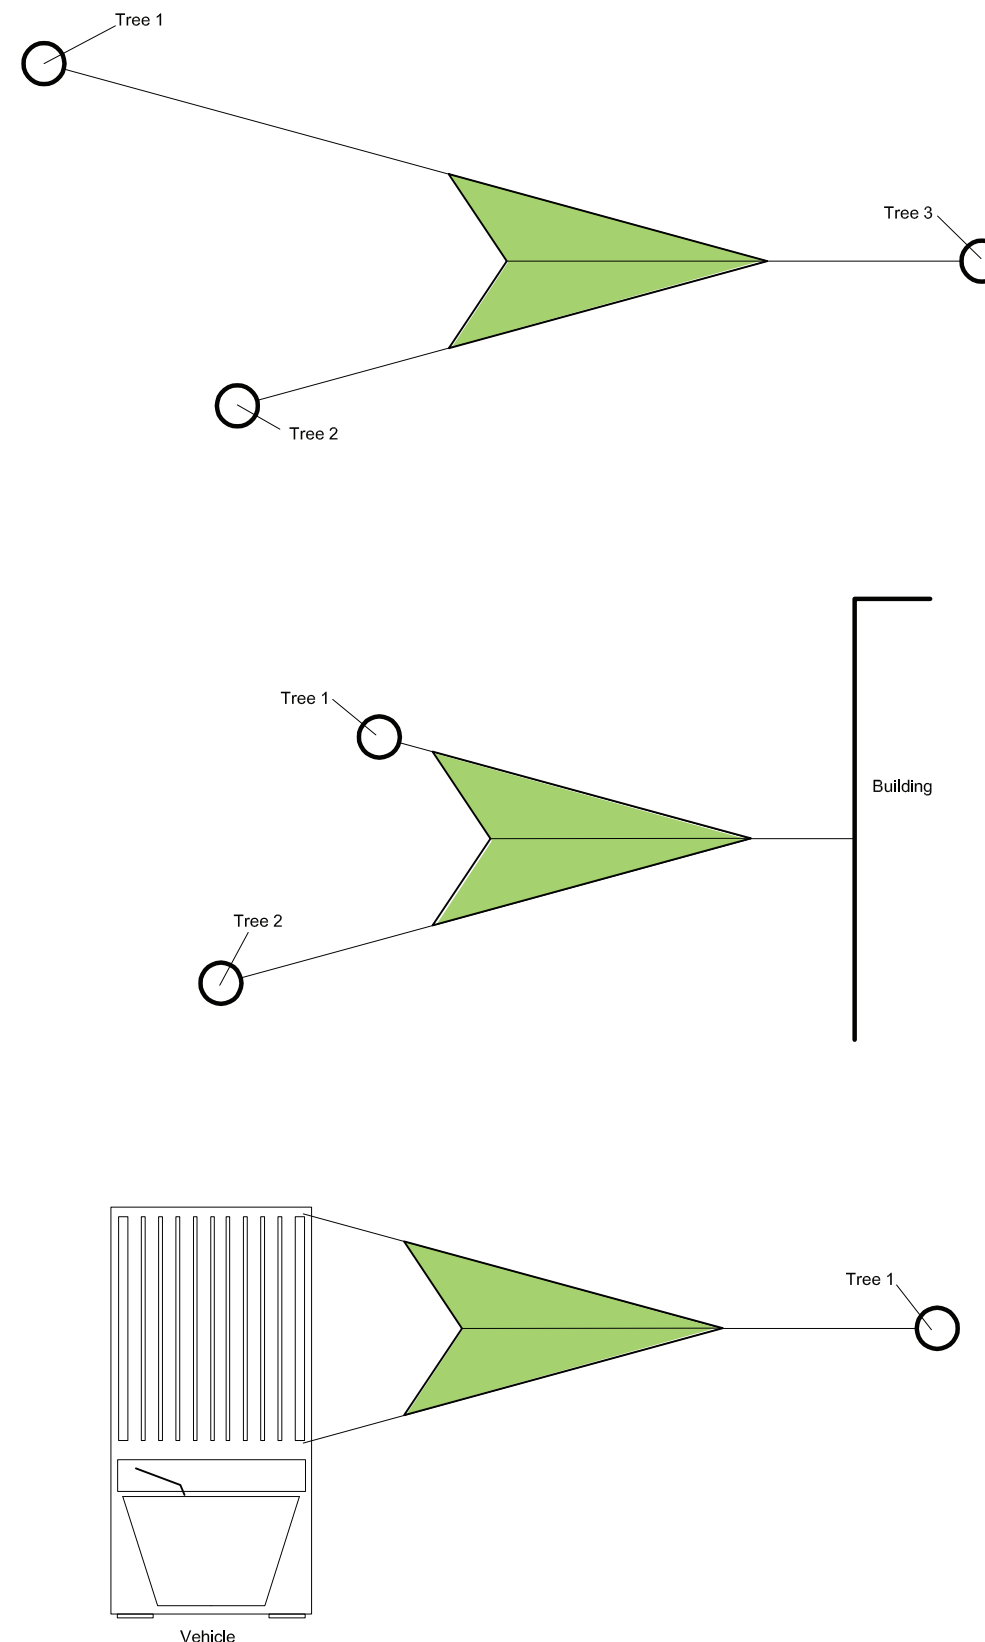

As with most things, practice will reduce the time it takes to set up **tentsile**. In a new and untried location, Type A set up will take about 20-30 mins. This is reduced to 5mins if you have used the site before and know the locations of your attachment points.

Prices

From £1,850 (GBP) per unit
 From \$2,900 (USD) per unit
 From €2,220 (EUR) per unit

Example Set-up Configurations

Brief Description

The 3-4 person **tentsile** offers suspended accommodation space for up to four people. With a versatile range of panel configurations, each occupant benefits from hammock-side windows, optional mosquito net, under-hammock storage space as well as a number of attachments loops.

The central area provides a communal space for group activities in bad weather or at night. This area also has the option of a removable top fly sheet, window panels and insect mesh to allow views to the sky and/or tree canopy. A fourth person can sleep on the mesh-bed of the central space.

Materials

All sheet materials are fire retardant and UV resistant, rot proof and breathable.
 2 Ounce silicon coated nylon Rip-Stop fly sheet
 4 Ounce silicon coated nylon Lower sheet
 6 Ounce PU coated texturised nylon Hammocks
 Mesh bed flooring
 35mm Webbing strap skeleton
 30mm Aluminium central pole
 6 x Aluminium battens

Weight Capacity

tentsile's frame is made from webbing straps with a breaking strength of 5 tonnes.

Type B is configured to take the weight of four adults and their luggage.

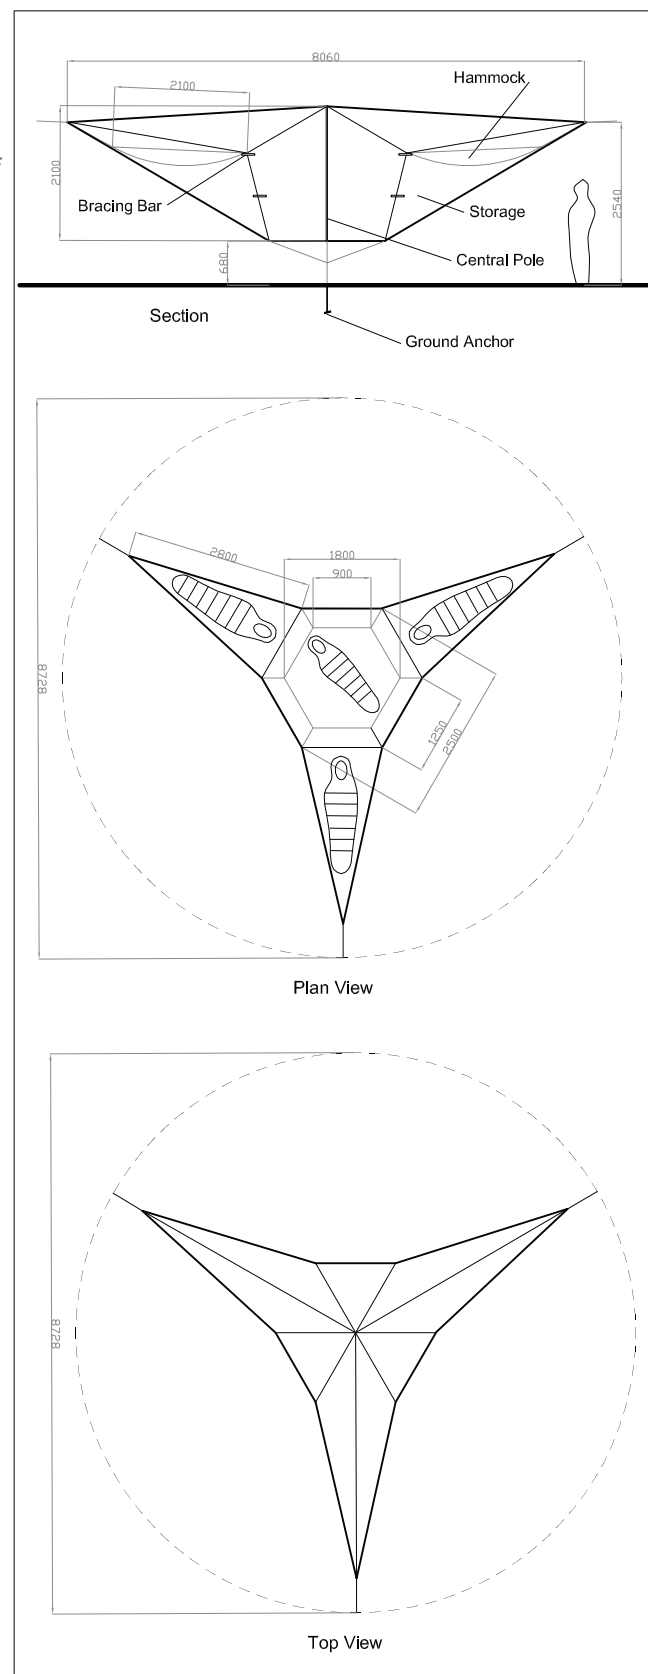

500 kg
1,100 lbs

Set-up Time

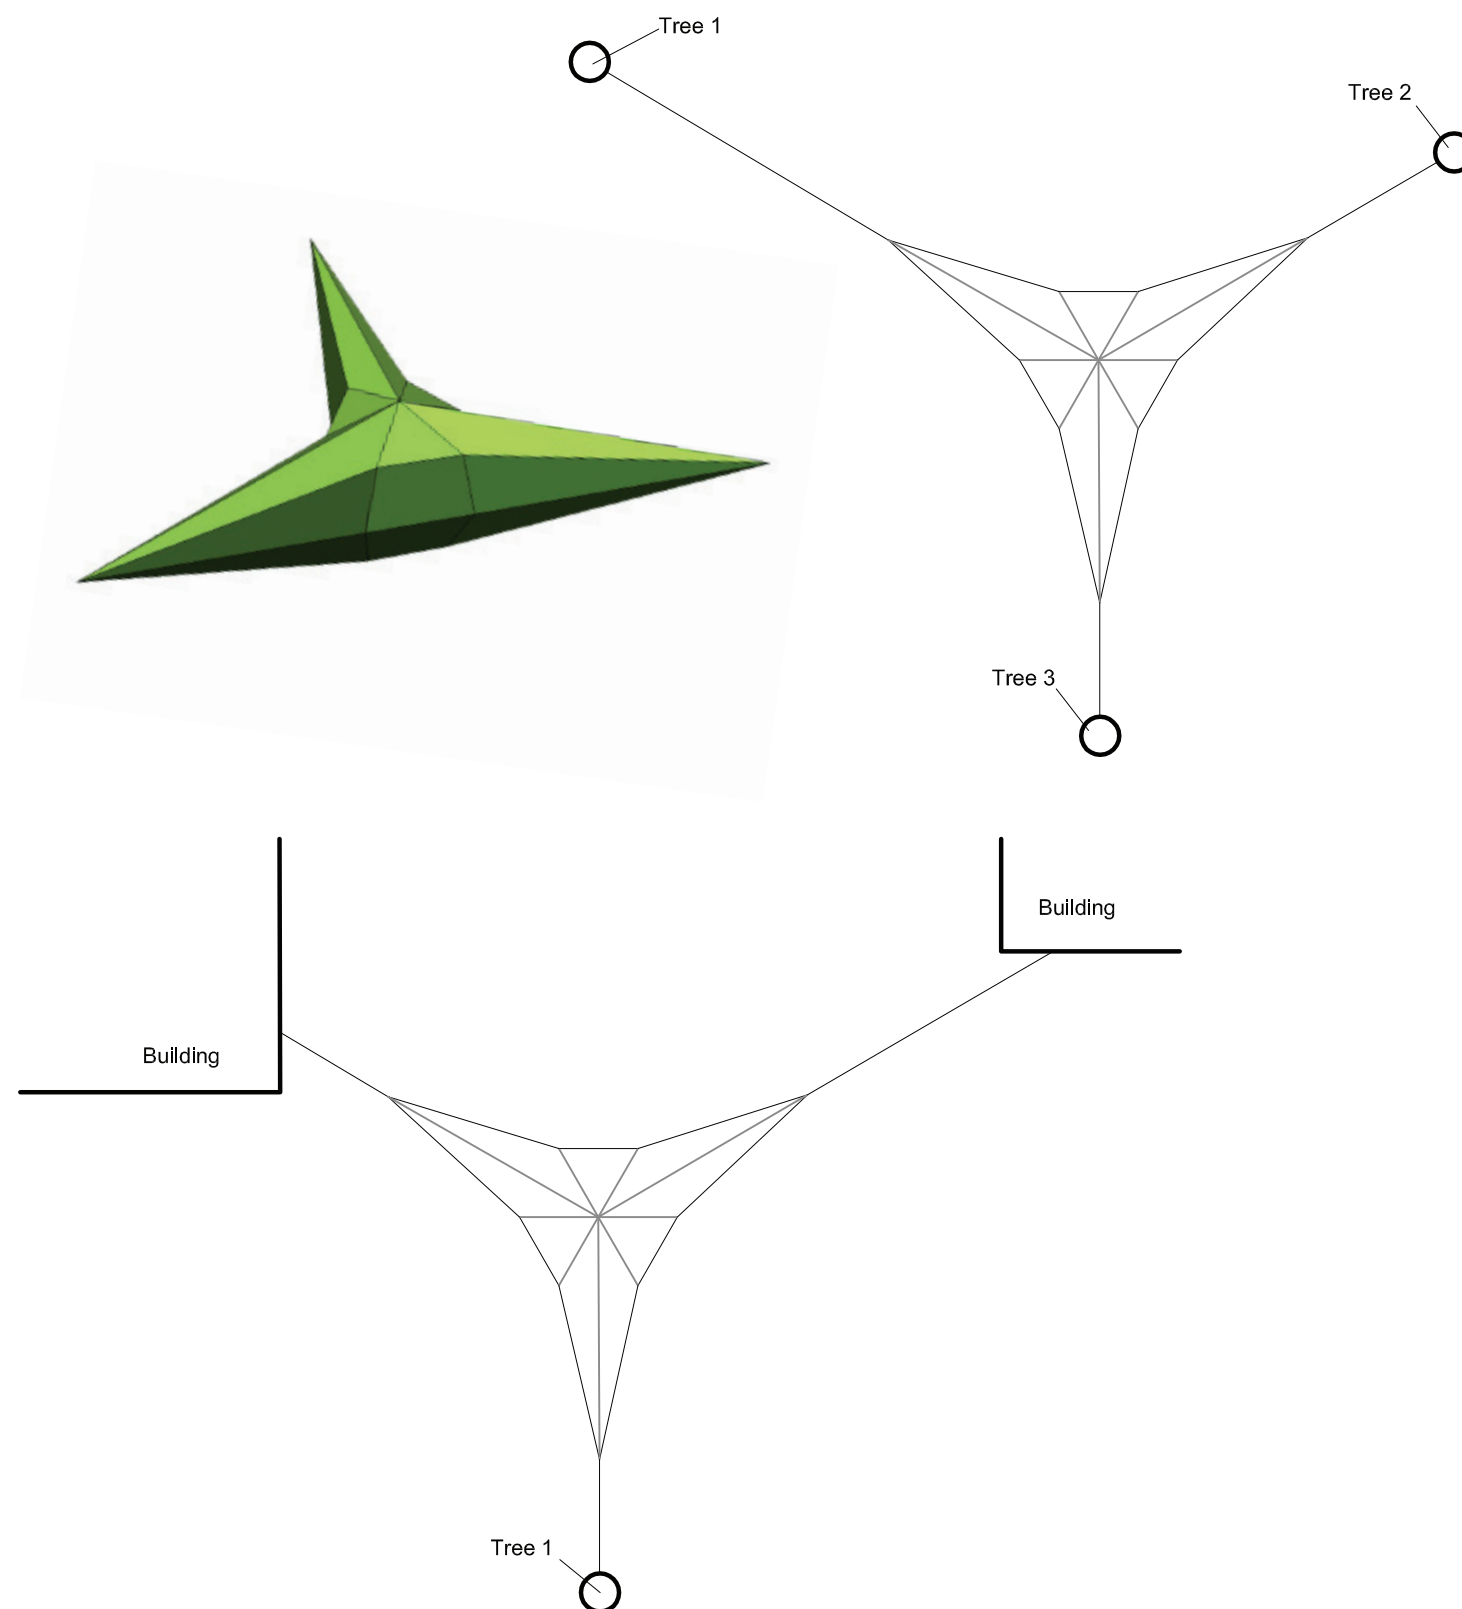

As with most things, practice will reduce the time it takes to set up **tentsile**. In a new and untried location, Type B set up will take about 30-40 mins. This is reduced to 5mins if you have used the site before and know the locations of your high level attachment points.

Prices

From £5,500 (GBP) per unit
 From \$8,620 (USD) per unit
 From €6,580 (EUR) per unit

Set-up Configurations

Brief Description

The 5-8 person tentsile is made to suit your specific needs. A broad range of panel configurations are designed to protect from insects, maximise light and allow groups of people to enjoy a unique view of the world together.

The larger body of this model provides enough space for a double bed in the central space whilst the three 'arm' hammocks can be widened to provide space for two people. Each Hammock comes with storage areas beneath and the option to partition from the communal space for increased privacy.

Materials

All sheet materials are fire retardant and UV resistant, rot proof and breathable.
 2 Ounce silicon coated nylon Rip-Stop fly sheet
 4 Ounce silicon coated nylon Lower sheet
 6 Ounce PU coated texturised nylon Hammocks
 Mesh bed flooring
 35mm Webbing strap skeleton
 30mm Aluminium central pole
 6 x Aluminium battens

Weight Capacity

tentsile's frame is made from webbing straps with a breaking strength of 5 tonnes.

Type C is configured to take the weight of up to eight adults and their luggage.

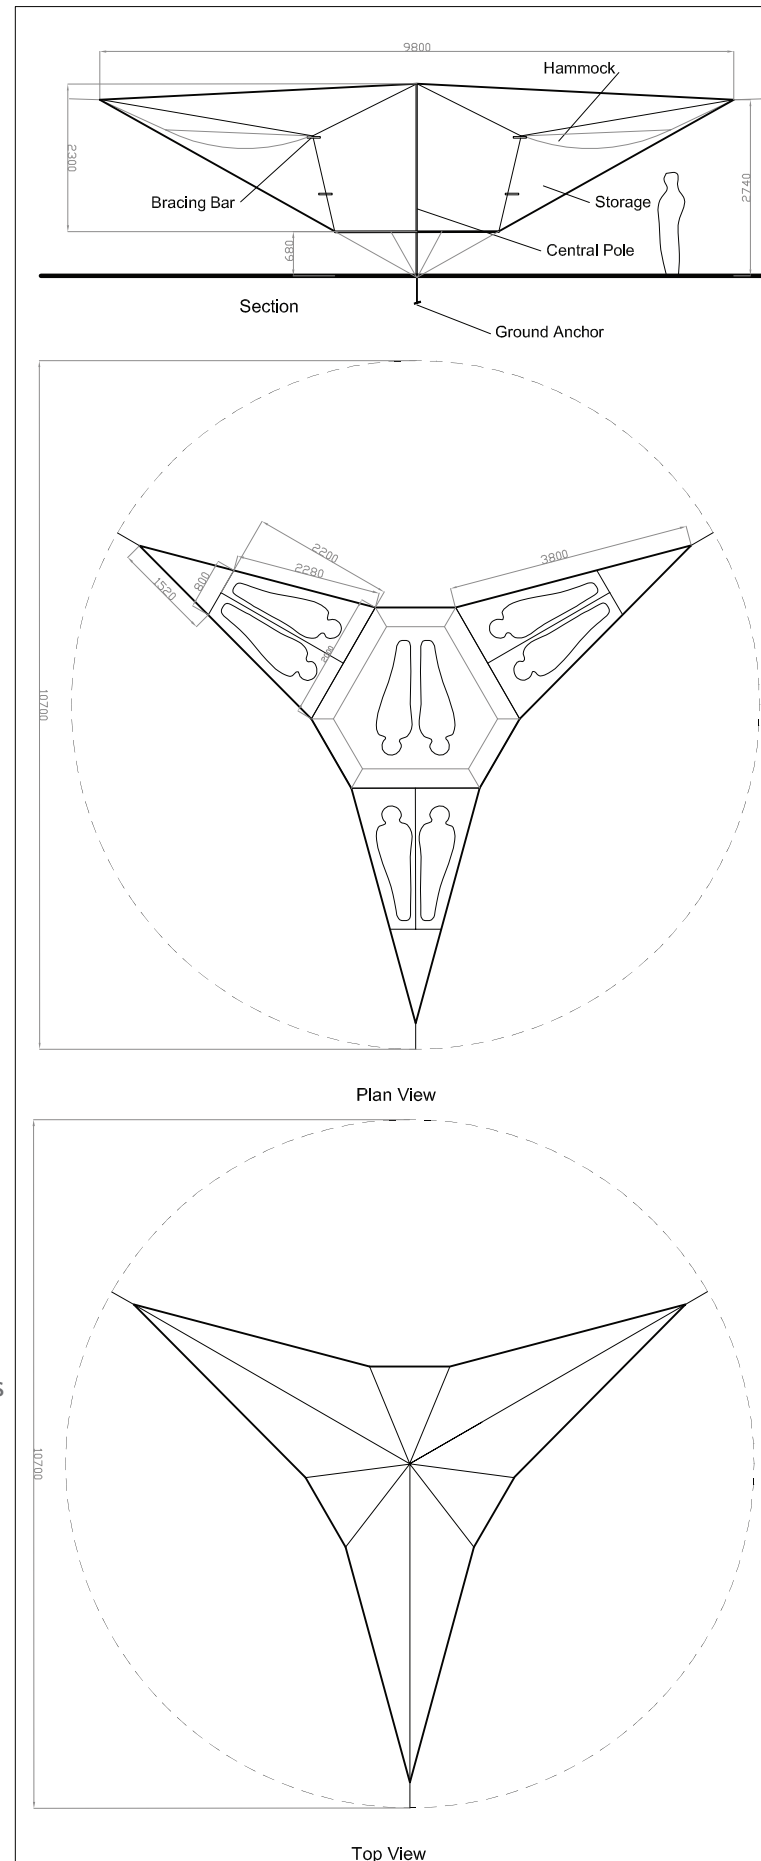

950 kg
 2,100 lbs

Set-up Time

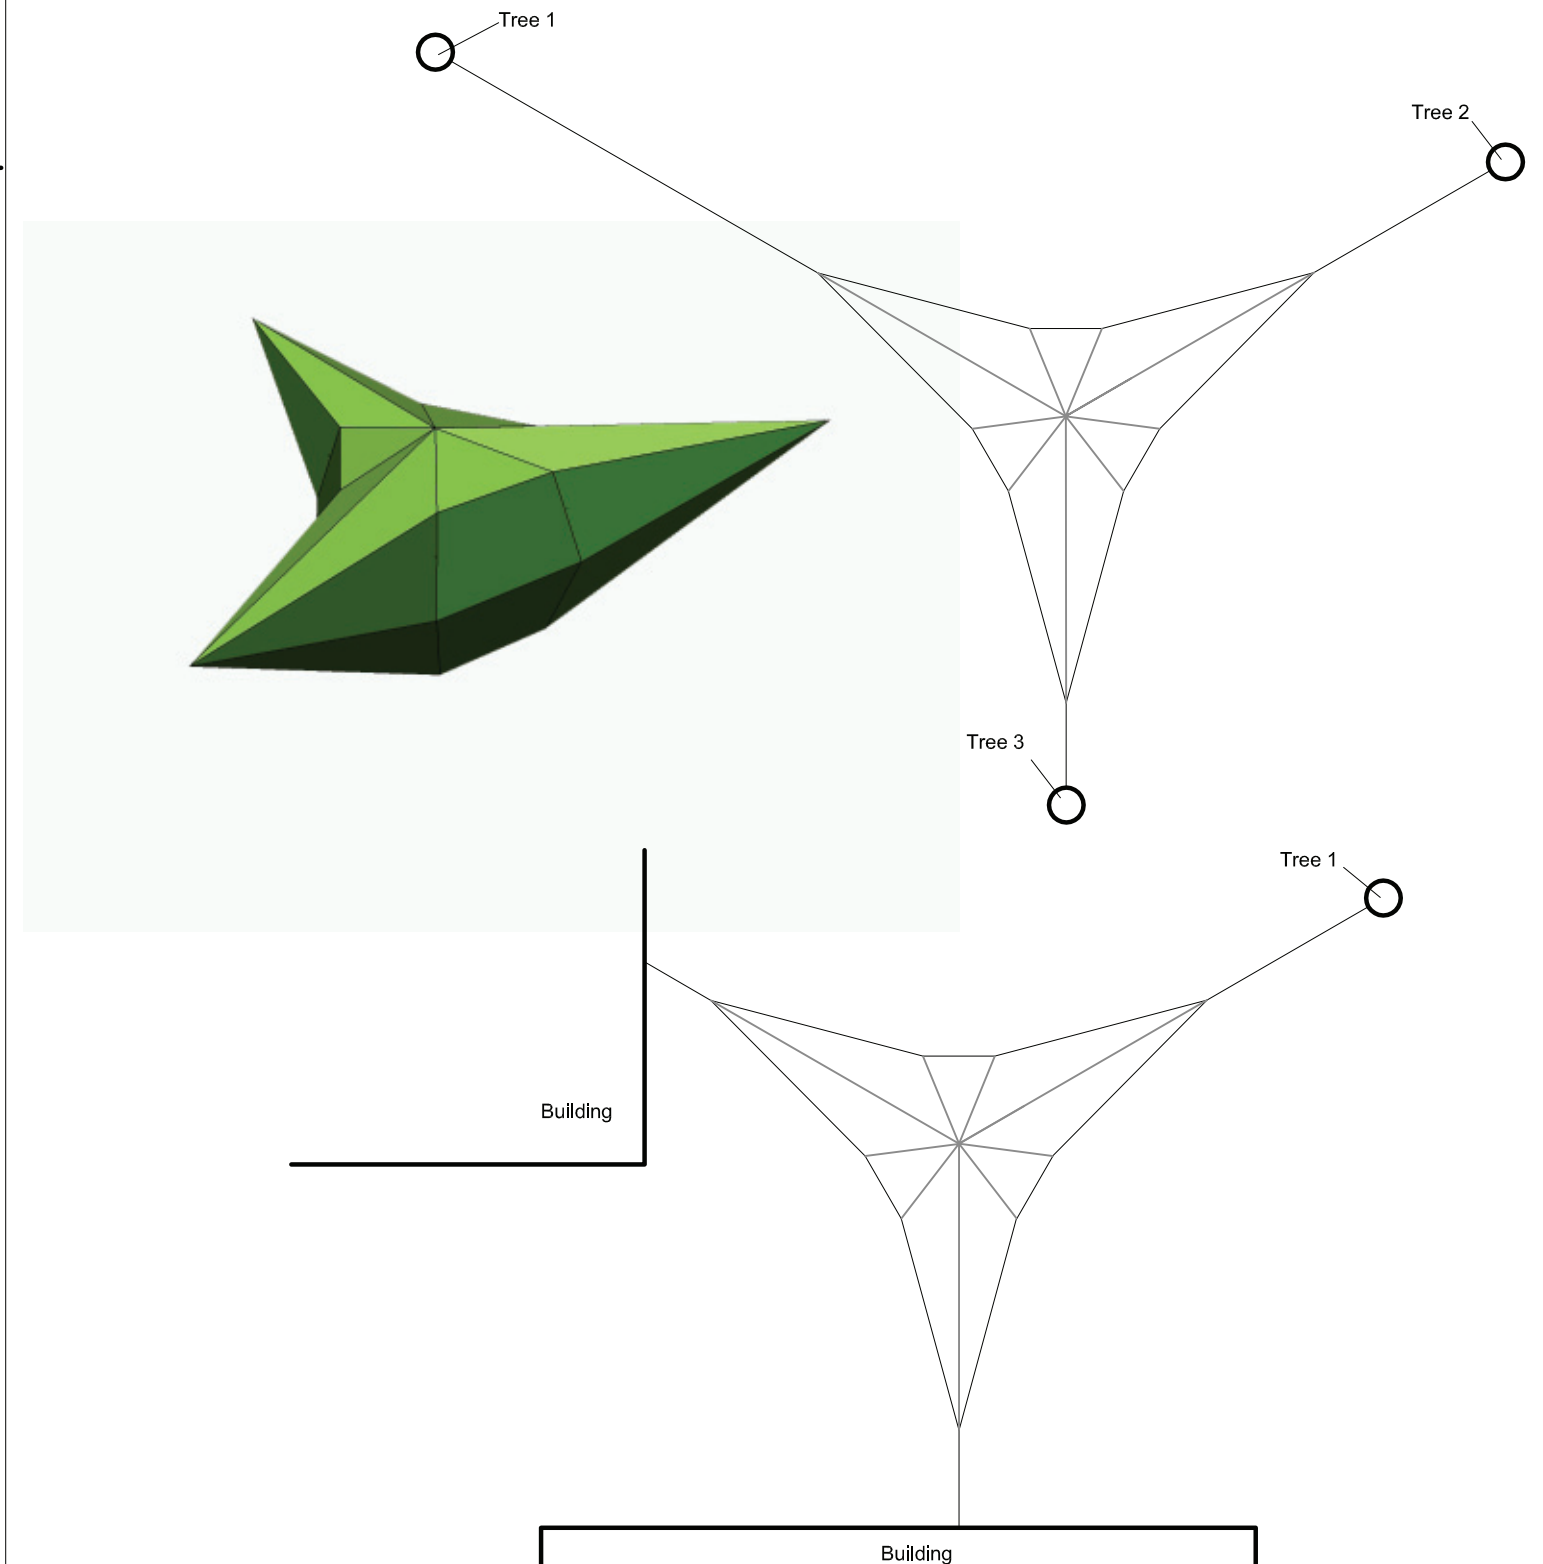

As with most things, practice will reduce the time it takes to set up tentsile. In a new and untried location, Type C set up will take about 30-40 mins. This is reduced to 10mins if you have used the site before and know the locations of your high level attachment points.

Prices

From £7,500 (GBP) per unit
 From \$11,800 (USD) per unit
 From €7,960 (EUR) per unit

zent
tentsile's little brother

www.tentsile.com

Brief Description

tentsile Zent is set up where there as a conventional tent. The only difference is that the poles become legs and allow space for the internal bedding area to act as an enclosed hammock. The concept keeps you off the cold ground and allows comfortable sleep to take place even if the ground is not level.

Materials

All sheet materials are fire retardant and UV resistant, rot proof and breathable.
2 Ounce silicon coated nylon fly sheet
Reinforced nylon sheet hammock
4 x Ball socket spreader feet
DAC Aluminium Poles (18.5mm diameter)

Weight Capacity

The tentsile Zent (1 person) is manufactured to take the weight of one adult and luggage.

Recommended maximum load capacity:

100 kg
220lbs

Set-up Time

As with most things, practice will reduce the time it takes to set up tentsile Zent. First timers can expect to spend about 10-15 minutes setting up while experienced campers could have this up in 5 minutes.

Pre Order Prices

From £199 (GBP) per unit
From \$320 (USD) per unit
From €240(EUR) per unit
